

Trabuco Road Streetscape and MPAH Project

This project is along Trabuco Road between Bake Parkway and Lake Forest Drive, and designed and constructed streetscape improvements to enhance traffic calming along this segment of the roadway. The improvements included pavement

rehabilitation, traffic signal improvements, parkway landscape improvements, and raised landscaped medians. On the west side (cemetery side) of Trabuco Road, the improvements included storm drain improvements, street widening, a sidewalk, and a bike lane. Construction on this project, including the plant establishment period was completed in November 2012. The City's contractor placed new asphalt in both directions of traffic on Trabuco Road between Bake Parkway and Lake Forest Drive.
